

COMMODORE PET COMPANION

COMPATIBILITY

Please read before purchasing

- Works with the 9-inch screen or 12-inch screen PET computers. CBM PETs have not been tested.
- 9-inch screen PETs including 2001, 4016, etc. can have composite and RGB2HDMI outputs running at the same time.
- 12-inch screen PETs including 4032, 8032, SuperPET, etc. can have RGB2HDMI outputs without modifications to the PET.
- 12-inch screen PETs composite output will require the EDIT ROM to be replaced. However internal monitor will no longer provide video and should be disconnected.
- Select video jumper for 9-inch to (Normal) and 12-inch to (Inverse).
- External audio with connection will work on all Commodore PETs.
- RGB2HDMI adapter is not included.
